PROFESSIONAL EXPERIENCE

1- Data engineer at Forvia

Project (Juin - August 2025) : Application of data engineer in the extraction and organisation of data using Palantir

- Understand the data from a business perspective and identify the corresponding technical elements.
- Process and clean the data such as casting, joining, filtering, and dropping irrelevant fields.
- Display the generated insights in a decision-making dashboard.

Stacks : Data Engineering, ETL, BI, Python, SQL

2- Data Scientist at PwC TAC

Project (February - June 2024): Integration of an AI solution for the automatic analysis of resumes :

- Develop a model for extracting information from resumes;
- Manage two interns to achieve the matching and web platform;
- Create a platform for matching resumes with HR requests.

Stacks : Data Analysis, NLP, LLM, Team Management

3- Data Scientist at Intech

Project (June - July 2023) : Creation of machine learning models for medical assistance :

- Create a predictive model for the cardiac state of a newborn based on analyses conducted on the fetus beforehand ;
- Collaborate in a team to create a model for breast cancer detection.

Stacks : Data Analysis, Classification, CNN, RNN, Tensorflow

PERSONAL PROJECTS

1- Prostate Cancer Prediction

Project (2025): Creation of a regression model to predict the likelihood of prostate cancer in men based on clinical and biological attributes.

- Clean and preprocess medical datasets containing prostate-specific parameters.
- Train and evaluate regression models to estimate cancer probability.
- Analyze feature importance to better understand risk factors.

Stack : Data Analysis, Regression, Scikit-learn, Pandas, Matplotlib

2- Geographic Classification of Individuals

Project (2025) : Classification of individuals by geographic origin using demographic and genetic features.

- Apply PCA to reduce dimensionality and visualize data.
- Train and test classifiers (KNN, SVM) on regional grouping tasks.
- Evaluate accuracy and visualize results on a 2D PCA map.

Stack : Classification, PCA, KNN, SVM, Numpy, Matplotlib

ABOUT ME

Last year student in the double Master of **Artificial Intelligence and Information Systems Engineering** at **ENSIMAG**. Dynamic, organized, and passionate about Data Science, I am eager to join your team with the aim of effectively contributing to the enterprise projects.

CERTIFICATIONS

Online training on Coursera (2023):

- "Machine Learning Specialization from Stanford" ;
- "Data Analysis with Python IBM" ;

ACADEMIC BACKGROUND

- Master of **AI** at **ENSIMAG** (2025-2026).
- Master at **ENSIMAG** of **Information Systems Engineering** (2024-2026).
- Bachelor at the **Higher Institute of Computer Science** (2021-2024)
- **Baccalaureate in Mathematics** with Honors (2020-2021);

LANGUAGES

French:	English:	Spanish:	Arabic:

CLUBS AND VOLUNTEERING

1- Club: Global Next Leader Forum Tokyo, Japan (2023)

An international forum bringing together leaders to discuss and collaborate on global issues.

2- Club: ISI Events (2022-2024)

University events organization club.

3- Club: Quality Committee (CpQ)

Certification Committee of the ISI faculty to ISO 21001 standard.

4- Volunteering: Tunisian Red Crescent (2020 - 2024)
