

■ Profile

Final-year double Master's student in AI and Information Systems at ENSIMAG. Strong background in **machine learning**, **statistics**, **NLP/LLMs**, and **scalable data systems**. Skilled in **Python** and **modern ML** frameworks (PyTorch, TensorFlow, Hugging Face). Experienced in building production-ready ML pipelines, optimizing performance, and contributing to open-source projects, including Scikit-learn. Currently seeking a 4–6 month end-of-studies internship starting February 2026 in Data Science / Machine Learning

■ Professional Experience

Data Engineer Intern – Forvia | Jun–Aug 2025

- Managed and structured large operational datasets in Palantir Foundry, ensuring consistency and reliability.
- Built scalable workflows for cleaning, integration, and monitoring of data pipelines.
- Delivered automated reporting tools and dashboards used by management for decision-making.

Data Scientist Intern – PwC TAC | Feb–Jun 2024

- Developed an NLP/ML pipeline for resume parsing and candidate-job matching using CNNs and RNNs.
- Deployed the pipeline into a production-ready platform, reducing manual screening by 80%.
- Led and mentored 2 interns, coordinating algorithm development and deployment workflows.

Data Scientist Intern – Intech | Jun–Jul 2023

- Built and optimized predictive ML models on complex, imbalanced datasets, achieving >85% accuracy.
- Applied deep learning (CNN, RNN) and anomaly detection methods for robust classification tasks.
- Collaborated in a cross-functional team of 5 engineers to refine models for deployment.

■ Projects

Open-Source Contribution – Scikit-learn (2025)

- Contributed bug fixes and improved documentation for the Scikit-learn library.
- Collaborated with the open-source community to improve usability and stability of widely used ML features.

Geographic Classification (2025)

- Applied PCA for dimensionality reduction and trained classifiers (KNN, SVM) for client segmentation.
- Achieved 88% accuracy on classification and produced visual insights with PCA.

■ Technical Skills

- **Languages:** Python, SQL, C++
- **ML/AI:** PyTorch, TensorFlow, Scikit-learn (contributor), Hugging Face, Transformers
- **Techniques:** NLP, CV, LLM fine-tuning, Deep Learning, Optimization, Regression, Classification, PCA
- **Tools:** Git, Docker, Palantir Foundry, Pandas, Numpy, Matplotlib
- **Concepts:** Software Engineering, MLOps (testing, deployment), Data Systems, Open Source Development

■ Education

- ENSIMAG – **Master of Artificial Intelligence** (2025–2026)
- ENSIMAG – **Master of Information Systems Engineering** (2024–2026)
- ISI – **Bachelor in Computer Science** (2021–2024)
- **Baccalaureate in Mathematics**, Honors (2021)

■ Languages

- **Arabic** (Native), **English** (Fluent), **French** (Fluent), **Spanish** (Advanced)

■ Clubs & Volunteering

- Global Next Leader Forum – Tokyo (2023)
- Tunisian Red Crescent – Volunteer (2020–2024)
- ISI Events – University event organization (2022–2024)
